Work Experience

CodeSynergiX

Valsad

Software Engineer

June 2024 - Sep 2024

- Built an SEO tool with React.js, enabling users to input website URLs, generate detailed SEO reports, and automate report delivery via email.
- Laravel application page integrated with SQL databases, enabling seamless admin updates and enhancing content management.
- Collaborated on full-stack development, integrating React.js, PHP, and Laravel to deliver scalable and responsive web solutions.

Projects

Healthcare

PHP, SQL

- A patient portal where users book appointments (PHP handles form processing, SQL stores appointments).
- PHP manages user login/registration with password hashing (e.g., bcrypt) and session handling. SQL stores user credentials securely and supports role-based access (patients, doctors, admins).
- PHP manages scheduling, cancellations, and rescheduling; SQL stores appointment details (date, time, doctor, patient ID) and checks for availability conflicts.
- Enables doctors to submit prescriptions, viewable by patients; SQL stores prescription details linked to patient and doctor IDs.

Online Book Store

PHP, SQL

- Developed a web-based platform for browsing, purchasing, or managing books, built using PHP for server-side logic and SQL for database management (e.g., MySQL).

Technical Skills

Programming Languages

PHP, SQL, JavaScript

Libraries/Frameworks

React.js, Node.js, Laravel, HTML5, CSS3

Database

MongoDB, Firebase, SQL

Platforms

Vercel, GitHub, Firebase
